An Audubon naturalist visited our class.

We learned about trees!

Match the following events with the rings on the tree:

ANSWER KEY

Circle one: When too many trees are in one place, all trying to get enough water, sunlight and nutrients, it is called:

- a.) Survival b.) War **c.) Competition** d.) Death

List four things a tree needs to survive: 1. Nutrients (soil) 2. Water

3. Air 4. Sunshine

Teachers: There is A LOT of information on this sheet. Please use your judgment in determining if students were successful. Example: Getting *either* the top or bottom right would be success to us.
