An Audubon naturalist visited our class.

We learned about seeds!

Today we learned about seeds! This is how the plant makes more of itself, or reproduces. Seeds come in all shapes and sizes. We investigated some today!

Draw a line to match the seed to how it is dispersed, or how it finds a growing place. The first one is done for you.

Dandelion

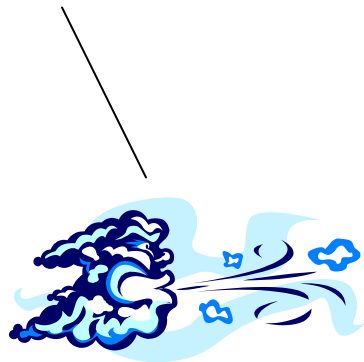

Berry

Burdock

Sunflower

Apple

Milkweed

Wind

Animal fur

Animal storing or eating and pooping

Draw a seed. Give it everything it needs to find a growing place – tasty fruit, wings, or hooks.
